If more than one search is submitted, please prioritize searches in order of need.
.....

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Let us know what you already have and so do not need. Include the keywords, synonyms and meaning of acronyms. Define all terms that may have a specific meaning. Please attach a copy of the background, abstract, claims and other pertinent information.

Please state how the terms or keyword strings should relate to one another.

STG - (B1) U.S. Patent (no pre-grant pub.) after Jan. 2, 2001
AB - A laptop computer is supplied with special-purpose software that detects when
the cover is being closed by an unauthorized person. When the cover is closed,
an alarm sounds using the speaker integral the laptop. The closed-cover condition
is detected. The software operates on either interrupt-driven devices or polled
devices which have some means for detecting that the cover is closed. The
software includes a password feature and a hot-key feature for overriding the
alarm so that an authorized person may close the cover without disturbing other
persons or to stop the alarm if the authorized person forgets to disable the alarm.
